Subject: Dodd-Frank Conflict Mineral Legislation

To whom it may concern:

The conflict mineral ores mined in the Democratic Republic of the Congo (DRC) and named in the Dodd-Frank Mineral Legislation are Cassiterite, Columbite, Wolframite, and Gold.

Columbite, Wolframite, and Gold are minerals not used to produce any of Weico Wire & Cable's products.

Cassiterite is the chief ore needed to produce Tin. Weico Wire does manufacture products that contain Tin.

Weico Wire has surveyed our suppliers of tin (Sn) plated copper wire and the source of their tin (Sn) is Indonesia, China, and Malaysia. They are aware of the "conflict mineral" problem with Cassiterite ore coming from the DRC, have avoided and will continue to avoid minerals coming from that region.

The tinned copper wire products supplied by Weico Wire do not utilize tin (Sn) originating from the DRC.

If you have any questions, or require further information, please contact me.

Sincerely,

Weico Wire & Cable, Inc
